

Patriot Engineering and Environmental, Inc.

Construction Industry Health & Safety Training

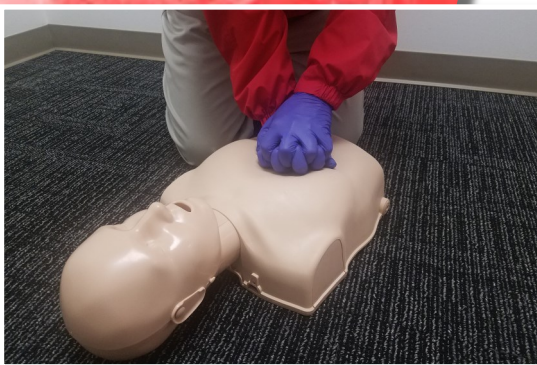

Patriot's safety training team has extensive experience in the field of health and safety, especially in the construction industry. Patriot's team, led by an Authorized OSHA instructor for construction, is dedicated to providing your company with education and training that meets regulatory requirements. We work with our clients to create training programs that are tailored to the jobs their employees will encounter on the jobsite.

Below are some of the many health and safety training courses that Patriot has provided to our clients:

- OSHA 10 Hour Construction
- OSHA 30 Hour Construction
- Aerial Work Platforms
- Silica Safety
